

Claim Amendments

Claims 1-3 (cancelled)

Claim 4 (new)

-4-

An elongate sill pan assembly for installation in a building structure below a window or door sill for diverting moisture away from the building structure, said elongate sill pan assembly including,

end members each having a moisture discharge channel formed therein inclined to the horizontal and a horizontal surface for supporting a sill,

a center section in surfacial engagement with each of said end members and having a horizontal surface coplanar with the horizontal surface of each end member for additional support of a sill.

Claim 5 (new)

-5-

The elongate sill pan assembly claimed in claim 4 wherein each of said end members has a forwardly disposed flange defining a channel contiguous with the moisture discharge channel of the end member.

Claim 6 (new)

-6-

The elongate sill pan assembly claimed in claim 4 wherein said end members each have a segment of reduced wall thickness in surfacial contact with the center section.

Claim 7 (new)

-7-

The elongate sill pan assembly claimed in claim 6 wherein the segment of reduced wall thickness of each of said end members slidably engages said center section.
